These points have been compiled by some of the leading experts in the fields of digital dermatitis. Please visit: delavalcorporate.com/five-point-plan-digital-dermatitis for more information and a complete list of the authors.

**Five Point Plan for Control of Digital Dermatitis**

1. External biosecurity to keep disease out of farm
2. Internal biosecurity to minimize infection pressure on cows
3. Early identification, recording and treatment
4. Frequent foot disinfection to reduce new cases
5. Define and monitor hoof health targets

**Authors:** Bergsten, Christer Dept. of Biosystems and Technology, Swedish University of Agricultural Sciences, SLU. Blowey, Roger Gloucester, UK. Capion, Nynne University of Copenhagen, Denmark. Fiedler, Andrea Hoof Health Practice, Munich, Germany. Geldhof, Julie DeLaval, Belgium. Holzhauer, Menno Dep. Ruminant medicine, GD Animal Health, The Netherlands. Kloosterman, Piet Dairy Training Centre, The Netherlands. Relun, Anne Dep. Animal Health, Nantes-Atlantic College of Veterinary Medicine, Food Science and Engineering (Oniris), France. The support of Tom Hemling, USA and DeLaval in facilitating development of this plan is greatly appreciated.
